Thanks for the additional info. I did find something on DNR's web site showing the mine, which they called "High Point Mine". It says it's new, and no overburden has been removed. The DNR mine number is "S-374". We will keep our eyes peeled for any applications for NPDES permits.

Catherine,

This article highlights the size and production expected from the recently permitted, presumably SMCRA, Seven Hills mine, under United Minerals.

So you know why we are interested in hearing as soon as United applies for coverage with an NOI and that we would like to receive that NOI on same day.
